Previous Crop:		Soybean residue was turbo tilled prior to planting.	No-till planted into soybean residue no-till planted.
Fertilizer:		Starter 30-30-0 broadcast Topdress 50N	Starter 50-30-0 Topdress 50N
Foliar fungicide applied:		Yes - April 18 with 4 oz tebuconazole	No - This field received hail damage on April 14 and was not treated.

All yields adjusted to 12.5% moisture.

The results presented here are from unreplicated demonstration plots.

For replicated research plot results farmers will want to study the 2012 K-State Wheat Performance Test Results available on the web or at the Extension office.

Special Thanks to: Vaughn Isaacson and Sons, Larry Breer and Tom, Pat and Luke Ryan for planting and harvesting the plots.
